The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,4-6, 19 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Swenson et al. (US Patent 5,885,628).

Swenson et al. discloses an injection molding assembly comprising a body portion 24, a tip portion 21 having at least one planar surface and a centrally located melt bore 18 extending through at least a portion of said body. See Fig. 7.

Claims 2 and 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Claims 2 and 3 define over the prior art since the prior art fails to disclose or suggest a planar surface area as found in the claims

Claims 7-18 are allowed. Claims 7-18 define over the prior art since the prior art fails to disclose or suggest a concave or convex surface as found in the claims.
